Wi-Fi extender has developed a lot since its inception. It is very easy nowadays to choose extenders according to your requirements. Today's we are telling you about one of the best Wi-Fi extenders which is available in the market these days. Later in the blog other than Linksys Extender RE1000 features we will also go to discuss steps for Linksys Extender RE1000 Setup. Features of Linksys Extender RE1000 Linksys Extender RE1000 can uphold wireless signal even at 150 feet far away from router. It comes with simple setup process and forceful feature set. You can use Linksys Extender RE1000 as wireless bridge also. Linksys Extender RE1000 is very handy small in size with two-prong electrical plug. It has WPS or reset button with fast Ethernet 10/100 network port on bottom serving as a wireless bridge designed for wired devices. When we talk about Linksys Extender RE1000 Setup, it comes with a CD for setup process and its configurations can be done through browser-based utility. Inside interface of Linksys Extender RE1000, you can analysis status of extender or information's for example channel width, signal strength and quality, as well as packet information. Before starting Linksys Extender RE1000 Setup, we want to update you that if you don't have setup CD then you can easily perform Linksys Extender RE1000 Setup, by doing a single call to our technical support team on toll free number night & day whenever you want to setup Linksys Extender. You also required available 2.4 GHz wireless network connection, due to ability of Linksys Extender RE1000 detecting and work with the 2.4 GHz network only. Also Wireless network name, password & security key are needed during extender Setup process. If you also don't have required network name or password security key these can also be obtained via our technical support unit. Place in the Linksys Extender RE1000 setup CD into CD drive of your computer. After the AutoPlay window appearance immediately click on set up Linksys Extender RE1000 selection. In case you are not able to see AutoPlay windowpane then go into computer local drive & double-click Linksys Extender RE1000 icon for further proceedings. When you see End-User License Agreement window has appeared just check the option "I have read and accept the License Terms for using this software box", and tap 'Next' for continuing Linksys Extender RE1000 setup. Wait for some time while setup process is processing. Again if you get while doing Linksys Extender RE1000 setup any error of like we can't setup your wireless connection, then follow the instructions provided in the setup window or click 'Next' to proceed. If you can't get ahead of this step then we will suggest you take expert advice from our team which is specially designed for all these issues. They will simply guide you on each step. So call right now. **print Title: Configuración manual de un extensor de señal RE1000 Article ID: 25211 El Amplificador de Rango RE1000 inalámbrico-N de Linksys** le permite repetir la señal inalámbrica a cualquier punto de acceso router para proveer una conectividad a Internet en áreas difíciles de alcanzar a través una conexión de un cable inalámbricamente. Si el CD de instalación que viene incluido no está disponible o si cambió los parámetros inalámbricos en su router o punto de acceso, otra la configuración manual es otra manera de configurar los parámetros del extensor de señal y este artículo le enseñará cómo hacerlo. Antes de comenzar, asegúrese de haber hecho lo siguiente: Identificar los parámetros inalámbricos del router/punto de acceso, lo cuales son: 1. Nombre de la red inalámbrica (SSID) Canal inalámbrico Tipo de seguridad y Contraseña de red inalámbrica Para saber cómo comprobar o cambiar la configuración de su red inalámbrica utilizando Linksys Smart Wi-Fi Account, haga clic aquí. Si su router tiene la página web de configuración clásica, haga clic aquí. Reiniciar el amplificador de rango - Mantenga presionado el botón Reset (Reiniciar) situado en el panel superior del amplificador del rango por ocho (8) segundos para reiniciar la configuración de fábrica por defecto. 2. Paso 1: Conecte su computadora al puerto Ethernet de su RE1000 usando un cable Ethernet. Paso 2: Conecte su RE1000 a la toma eléctrica. Asegúrese de que las luces LED estén estables. Paso 3: Inicie su navegador web e ingrese la dirección IP por defecto 192.168.1.1 en la barra de direcciones. NOTA: Si su computadora ha identificado la página web de inicio predeterminada en su navegador, una ventana de diálogo solicitará el nombre de usuario y la contraseña automáticamente. Paso 4: Una ventana de aviso aparecerá preguntando usuario y contraseña. Deje el User Name (Nombre de Usuario) en blanco y escriba "admin" en el campo Password (Contraseña). Luego haga clic en Log In (Iniciar sesión) Configuración manual de un extensor de señal RE1000 de 416/06/2014 10:21 Paso 5: Haga clic en Wireless > Basic Wireless Settings (Función inalámbrica > Parámetros inalámbricos básicos). Paso 6: Seleccione el botón de radio a Manual y a continuación escriba el Nombre de la red (SSID) de su router. Paso 7: En Wireless Security (Seguridad inalámbrica), seleccione los parámetros de seguridad que coinciden con la configuración Configuración manual de un extensor de señal RE1000 de 416/06/2014 10:21 de su router. Ingrese su Contraseña o WEP Key y luego haga clic en Save Settings (Guardar cambios). WPA2/WPA Mixed Mode WPA Personal o WPA2 Personal WEP Configuración manual de un extensor de señal RE1000 de 416/06/2014 10:21 Learn how to setup Linksys Re1000 Extender, which supports increasing the wifi range of your wireless router. The Linksys Extender is compatible with B and G technology & needs to work on your recent wireless network. It has one ethernet port on the bottom side to allow quick plug and play installation. Furthermore, when configured you can connect any device with an ethernet cord to this Extender for better Internet Connectivity. Linksys RE1000 is the best Range Extender for home or office riddled with internet dead zones. The small size of this extender makes it easy to plug into a wall outlet. This is a great device, if your house or office is big enough then you can opt for higher performance Linksys Extenders. Features of Linksys RE1000 Linksys RE1000 can uphold wireless signals even at 150 feet far away from the router. It comes with a simple setup process and a forceful feature set. You can take Linksys RE1000 for wireless bridge also. Linksys Extender RE1000 is very handy and small in size with two-prong electrical plugs. It has a WPS or reset button with fast Ethernet 10/100 network port on the bottom serving as a wireless bridge designed for wired devices. Steps to Setup Linksys RE1000 Extender First of all, connect the Linksys Extender for its Setup into a power cord close to your router. In order to configure it, we have to make sure that the computer should be connected with an ethernet cable to the Range Extender. Go to your web browser such as (Google, Firefox, Safari) and tap on the website extenderlinksyssetup.com / extender.linksys.setup or type IP address 192.168.1.1 in the address bar. Now, it will ask you to enter the username and password in the field. To establish wireless security on the WiFi range extender, tap on basic wireless settings on the web-based setup page. Now choose your WPA Security mode menu and type the main wifi password of your router. And then click on the SAVE option. Now you can successfully connect your device to the wifi range extender. At the last, Green WiFi Led light will show the successful configuration of your Linksys extender. Your Linksys Extended Network will display like (_EXT) at the end of your main network's name. Using Installation CD: As you must know that Linksys WiFi range extender comes along with an installation CD. Take the help of this installation CD, you can easily install the RE1000 extender in your network. The steps involved in it are straightforward. Using the Manual Method or Web-Based Utility: This process is so helpful for you if, because of any reason, you have lost the installation CD. The purpose for the same is that in this method, you no longer need any installation CD. This method uses Linksys local web page such as. . It is the reason why this method is also known by the name of the web-based utility method. So, after understanding what this method is, turn to steps involved in setting up extender using the manual method. Using WPS Method: As you see already mentioned in the section of features, that Linksys RE1000 extender comes along with the WPS button. It makes it able to be installed using the WPS method. WPS method is also a right way if you want to setup Linksys RE1000 extender without using the installation CD. Steps involved in the same are straightforward. First of all, you need to switch on your Linksys WiFi extender then press the WPS button present on it. Then within a fraction of time, press the WPS button on your router. That's all, now you can setup Linksys RE1000 extender in your vicinity using the WPS method. But one thing is worth attention, and that is you can use the WPS method only if your home router supports WPS; otherwise, you will be left with only two options, you have to choose to follow manual method or installation using installation CD. We hope all the information provided in this article will help you to setup Linksys RE1000 Extender, and if in case you need any support, then visit the Linksys's official website.
